Department of Health Services Children's Medical Services Network (CMS Net) - Information Bulletin #205

March 2007 Change Cycle

The following is a list of changes which were added to the CMS Net System for the March Change Cycle:

New County Added to CMS Net:

Orange County is now in CMS Net. State Information Technology Staff will be in Orange for another week helping Orange transition to the system.

CMS Net Legacy:

Follow-Up: The Follow-Up Module was designed to provide users with an automated mechanism to notify another county user an action is required on a client's record. The Follow-Up Module encompasses creating requests for follow-up, posting follow up responses, posting pending follow up notifications and displaying historical follow up completed requests.

This module will allow users to search, post, edit, delete, transfer and track a follow up notification on any record for their county. Users will only be able to see and work with follow ups assigned to them. In addition, this will allow a single requestor to post the same notification for multiple users.

The CMS Net legacy manual has been updated. The manual is online at <http://www.dhs.ca.gov/PCFH/cms/ccs/cmsnet/manuallegacy.htm>. The new manual sections are:

- Section 45 - [Enter New Follow Up Requests](#)
- Section 46 - [Edit Follow Up Requests and Responses: As Requestor](#)
- Section 47 - [Respond to Follow Up Requests](#)
- Section 48 - [Edit Follow Up Requests and Responses: As Responder](#)
- Section 49 - [Follow Up History](#)
